DETAILED ACTION

1. Claims 4-11 and 17 are pending in this Application.
2. Examiner would like to remind Applicant, in response to this office, to cancel the unelected claims 12-16 and 18.

Information Disclosure Statement

3. The Information Disclosure Statements (IDSs) received on 5/16/06 and 7/03/07 have been approved by the Examiner and the initialed copies (two pages) of the IDSs are attached with this correspondence.

Priority

4. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

5. The drawings are objected to under 37 CFR 1.83(a) because they fail to show the disclosed "data channel including E-DPCCH" in figures 4-6 as described in the specification in paragraph [0066]. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended

replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

6. Figures 29-31 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) **BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).**
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

7. the "BRIEF DESCRIPTION OF THE DRAWING" starting paragraph [00168]- through paragraph [0214] should be before the "PREFERRED EMBODIMENT FOR CARRYING OUT INVENTION" in paragraph [0058]. See highlight above BRIEF DESCRIPTION OF THE DRAWING before DETAILED DESCRIPTION OF THE INVENTION.

8. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: "Channel Code Assignment according to Gain Factor."

Allowable Subject Matter

9. Claims 4-11 and 17 are allowed.

The following is an examiner's statement of reasons for allowance: the claimed subject matter in claims 4-11 and 17 is allowable because the arts of record fail to teach or fairly suggest the claimed "a communication apparatus (claimed method in claim 17) comprising: a controlling unit for controlling assignment of channelization codes for a data channel and a control channel at the I side and the Q side multiplexed by the IQ multiplexing unit; wherein the controlling unit comprises: a code assigning unit by factor for, based on a size of a factor that is multiplied to the data channel and the control channel by the IQ multiplexing unit, assigning a first channelization code to a data channel of which the factor is large; and a remaining code assigning unit for assigning a second channelization code being different from the first channelization code to a data channel to which no channelization code has been assigned by the code assigning unit by factor; and in combination with each and every claimed limitations in claims 4 and 17." See controller in figure 9 and 10 and corresponding disclosure having channel assignment module according to the gain factor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patent numbers 6,693,952 and 7,397,839 issued to Chuah et al. and Maeda et al. respectively and US Patent Application Publication number 2006/0217088 issued to Nagaka et al. disclose a transmitter having means for assigning channel codes.

11. This application is in condition for allowance except for the following formal matters:

The objection to the drawing and specification indicated above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
